I. You have received a letter from your English-speaking pen friend Zoe. This is what she wrote:

... I'm so fascinated that smartphones are now actively making their way into classrooms. I strongly believe that there are ways to use them responsibly to teach and educate the young minds. There are many educators, however, who view smartphones with suspicion and caution. Do you face similar problems in your school? How do you solve it and what can I as a student do to demonstrate the nearly unlimited value smartphones hold as teaching tools? On second thoughts, maybe I should just take things easy?

Using 60–80 words, write a letter to Zoe, answer Zoe's questions, and ask her 3 questions of your own. Follow the rules of letter writing.

Dear Zoe,

It was great to hear from you. Actually, I do face similar problems in my school. I solve it by showing my teachers smartphones as teaching tools. As a student, you should do it too. Besides, you shouldn't worry about it: it's not a big deal. By the way, why do you think some educators view smartphones with suspicion? Do you think our generation will use them constantly? If so, will it change anything?

Yours,
Nora

II. Explain the meaning of the following proverb using 60–80 words:

Do not cry over spilled milk.

The following proverb "Do not cry over spilled milk" basically means "Do not stress over something that has already happened". Crying over milk that you have already spilled is only a waste of time, and instead of doing that, you should focus on things which are truly important and which you can still affect. Spilled milk is definitely a good example of things in the past that you should not worry about.

Комментарий:

III. Read the Russian article below. Summarise the article in English and express your opinion about the story using 40–60 words. DO NOT translate the original article!

Прошлое и будущее лингвистики

По сравнению с астрономией или физикой, лингвистика – очень молодая наука. Современная теоретическая лингвистика начинается с Фердинанда де Соссюра, то есть с XX века. Как считают ученые, из наук XXI века лингвистика, безусловно, должна быть не последней, потому что язык – это очень важное звено в понимании человека, ключ к человеческой психике, к культуре и ко многому другому. Проникновение в природу языка может дать человечеству очень много.

Лингвистика как наука очень перспективна, но может оказаться так, что у этой науки исчезнет объект изучения. Это связано с глобализацией, с теми изменениями, которые идут последние 300–400 лет: мир становится меньше, контакты между людьми интенсивнее, и это ведет к сокращению числа языков.

Основной проблемой является проблема выживания языков малых народов. Крупные языки непрерывно «проглатывают» мелкие – люди перестают говорить на своем родном языке ради безопасности, благополучия, успеха, продвижения по социальной лестнице. Для лингвистики это катастрофа, ведь каждый язык уникален и неповторим, и если мы любой из них потеряем, пусть самый маленький и незначительный, то наша теория языка станет непоправимо беднее.

Summarizing the aforementioned, linguistics is of great prominence to the modern society. It leads to the understanding of many life aspects, such as culture and psychology, which makes it a perspective study field, Unfortunately, due to globalization, many languages become extinct. Consequently, the language theory might lose its complexity, and that is a huge threat to lingustics.

IV. Comment on the story in pictures using 60–80 words:

The two men shown in the pictures are sitting together and playing a suspiciously weird game. Personally, I have never seen someone playing with a drill or with a hammer. As far as I can see, they look like builders. They are supposed to be working, yet they are just spending their time pointlessly! Their boss should probably teach them a lesson about being professional.
